Route**Match**
Software[™]

ITS Solutions for Rural Transit

“Managing and Coordinating Transportation in Rural Communities Using Transit ITS Technologies”

Today's Agenda

- ❑ Overview of RouteMatch Software
- ❑ What is Transportation Coordination
- ❑ Technology's New Role in Community Transportation
- ❑ Advanced Transportation Management Systems & Coordination Tools
- ❑ Case Studies & Best Practices

RouteMatch Software Overview

- ❑ Founded in 1999 and incorporated in January 2000.
- ❑ A dedicated customer-focused staff of 40+ engineers, consultants, and customer support representatives.
- ❑ Headquartered in Atlanta, GA, with offices in North Carolina, South Carolina, Massachusetts, Iowa, Texas California, and Washington Sate.
- ❑ Over 160 installed public, private, and non-profit transportation organizations in 36 states nationwide.

**RouteMatch Offices,
Atlanta, GA**

The RouteMatch Focus

❑ Industry:

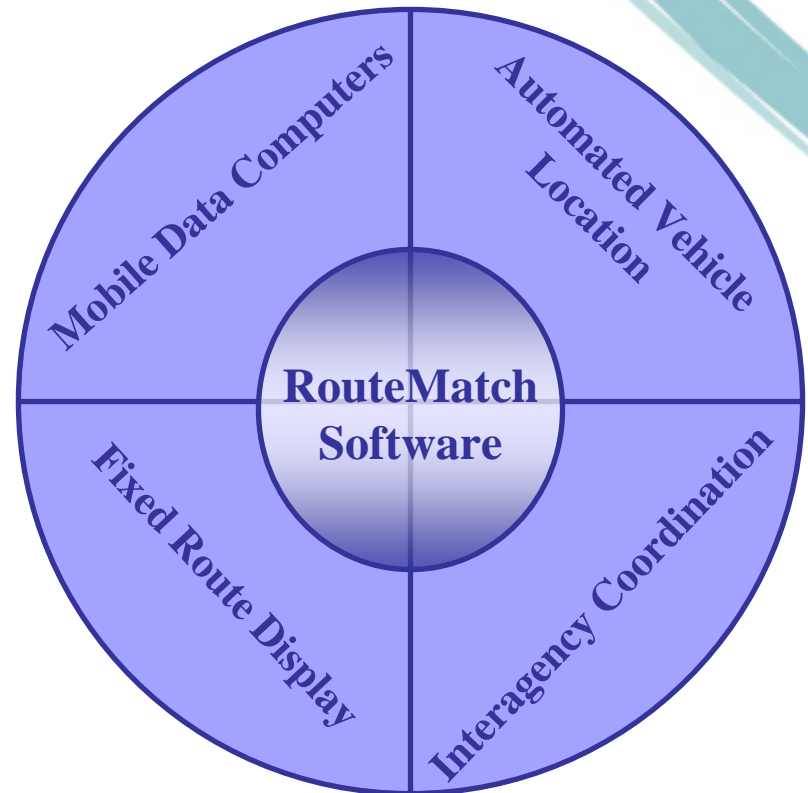

- ✓ Public and Human Service Transportation
- ✓ Brokerage and Managed Care Transportation
- ✓ Non-Emergency Medical Transportation

❑ Technology:

- ✓ Intelligent Transportation Systems (ITS)
- ✓ Scheduling and Routing Optimization
- ✓ Integrated Geographical Information Systems (GIS)
 - Computer Aided Dispatching
 - Local, Regional, and Statewide Coordination
 - Advanced Data Management
 - Wireless Integration
 - Customer access via the Internet

The RouteMatch Solution

- ❑ A simple, “user friendly,” modular software design.
- ❑ Integrate with the “best in breed” ITS providers.
- ❑ This approach allows technology to grow as the agency grows.

RouteMatch Customer Locations

What is Transportation Coordination??

What is Transportation Coordination??

It could be...

A cooperative arrangement between transportation service providers to improve the performance and operational efficiency of their service.

What is Transportation Coordination??

Coordination is also SHARING

- Multiple agencies with similar goals in disparate places.
- Government and various providers or funding sources.
- Fixed route system and demand response service providers.

Shared Objectives

Shared Knowledge

Shared Power

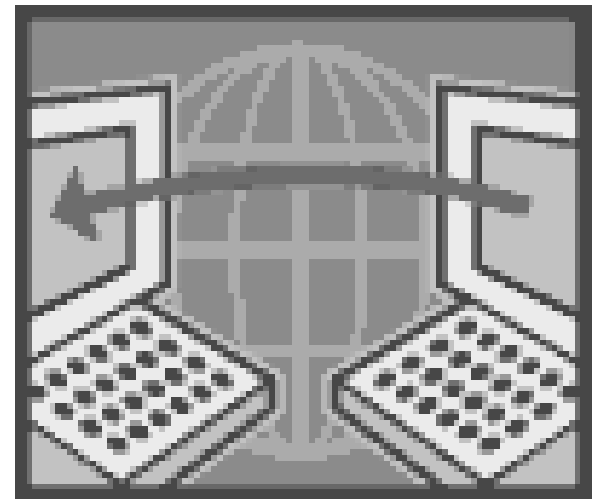

Shared Success

What is Transportation Coordination??

The Technology Perspective

The ability to link systems, data, funding and people to improve the performance and operational efficiency of transportation services.

The New Role of Technology in **Community** Transportation

The New Role of Technology in Community Transportation

❑ Federal initiatives:

- ✓ USDOT - United We Ride
- ✓ USDOT - Mobility Services for All Americans

❑ State initiatives

❑ A communicator – reducing institutional barriers.

❑ Improved system efficiency and effectiveness.

FEDERAL INTERAGENCY COORDINATING COUNCIL ON ACCESS AND MOBILITY

Action Plan KEY DELIVERABLES

- **GOAL 2 - CONSOLIDATED ACCESS**

“To simplify access to transportation services and to enhance customer service through the development of a comprehensive and coordinated transportation system.”¹

- **Deliverable #3: “Computerized consolidated reservation, scheduling, dispatch, payment, billing, and reporting systems developed and disseminated.”¹**

(1) Federal Interagency Coordinating Council on Access and Mobility, Implementing the Executive Order on Human Service Transportation Coordination’s Action Plan Key Deliverables.

USDOT: JPO & FTA

Mobility Services for All Americans (MSAA)

- ❑ Builds on USDOT's United We Ride efforts through the use of Intelligent Transportation Systems (ITS)

- ❑ MSAA Objective:

“Replicable/Scalable Traveler Management Coordination Center (TMCC) that provides one-stop, unified, customer-based travel information and trip planning services, and supports coordinated human service transportation operations.” ¹

Paratransit Management Systems

- Where does this person live? Are they within the ADA boundaries? Are there other services available to them?
- Is this consumer trained to ride a fixed route? If so, do they want to participate in our Bus Pass Program?
- What programs are they eligible for and what are the reimbursement rates? What restrictions does this customer have for each program?
- Does this person require special equipment, services, or have unique transportation characteristics?

Coordination Tools

Coordination Tools

- **Paratransit – Fixed Route Interoperability**
- **Paratransit and Human Service Coordination**
- **Consumer Access**

Integrate Fixed Route Information into your software to make a Demand Response System "Aware" & informed.

- ✓ Fixed Route Pattern
- ✓ Route Availability
- ✓ Time Points
- ✓ Accessibility
- ✓ ADA Boundary Determination

Integrate Your Bus Stop Information:

- ✓ ADA Accessibility
- ✓ Walking Barriers
- ✓ Environmental Barriers
- ✓ Physical Descriptions
- ✓ Curb Cuts, Concrete Pad, Information, Hand Rails, Seats, Shelters, etc...

Coordinate Demand Response and Fixed Route Services to Provide More Options to Your Consumers.

Consumer Access

Real Time Bus Stop Information

- Real time bus information at MY bus stop and about MY bus.
- 80% of riders board at 30% of stops.
- Leverage ITS investment to maximize the greatest impact on the rider's experience and to attract new passengers.

Case Studies & Best Practices

□ Statewide Transit ITS Projects

- ✓ Iowa Rural Transit ITS Consortium
- ✓ South Carolina Virtual Transit Enterprise (VTE)

□ USDOT/FTA Rural Transit ITS Demonstration Projects

□ Regional & Local Community Transportation ITS Projects

- ✓ Kentucky Medicaid Transportation Regions
- ✓ Paducah Transit Authority, Paducah, KY

Case Studies & Best Practices

Statewide Transit ITS Projects

❑ Iowa Rural and Urban ITS Consortium

- Partners: Iowa DOT and the Rural Transit ITS Consortium.
- Funding: FTA ITS earmarks.

Technologies include:

- Centrally-hosted statewide system
- Scheduling, Routing, Dispatching Software (RouteMatch TS)
- AVL/MDC
- Coordination Technologies
- Web-based ASP Deployment for centralized coordination and standardization.

Case Studies & Best Practices

Statewide Transit ITS Projects

❑ South Carolina Virtual Transit Enterprise (VTE)

- Partners: SCDOT and 10 regional transit authorities.
- Funding: FTA ITS earmarks.

Technologies include:

- Scheduling, Routing, Dispatching Software (RouteMatch TS)
- AVL/MDC and Interactive Voice Recognition
- Coordination Technologies
- Fixed Route Integration for Small Urban Systems
- Accounting Integration
- Web-based ASP Deployment for centralized coordination and standardization.

Case Studies & Best Practices

❑ USDOT/FTA Rural Transit ITS Demonstration Projects

- ✓ Northern Shenandoah Valley Public Mobility Project, Winchester, VA
- ✓ Sweetwater County Transit Authority, Rock Springs, WY
- ✓ Eastern Carolina Council of Governments, New Bern, NC
- ✓ Maryland Upper Shore Transit System: Queen Anne, Talbot, Kent, Dorchester, & Caroline Counties, MD

Case Studies & Best Practices

Regional & Local Community Transportation ITS Projects

❑ **Kentucky Medicaid Transportation Program**

- Coordination and brokerage technologies
- RM partners with five of sixteen regional Medicaid transportation brokers across KY.
- Integrates public transit, Medicaid, health and human services, and other transportation funding programs into a single, coordinated system.
- Regional brokers include: Paducah Transit Authority, GRITS, Federated Transportation of Blue Grass, Central Kentucky, and Kentucky Foothills

Case Studies & Best Practices

Regional & Local Community Transportation ITS Projects

❑ Paducah Transit Authority, Paducah, KY

- ✓ **Software Goal:** A high trip volume necessitated the automation of paratransit routing & scheduling while reducing time on reporting and errors.
- ✓ **Results:**
 - Doubled trip capacity from 225,000 to 453,000 per year.
 - Billing & Reporting time savings from 5 days to 1 hour.
 - During first week, PATS reduced their number of drivers by four.
 - Reduced data entry to one person.
 - Operates in a paperless environment with AVL/MDC.
 - Direct Medicaid billing to Commonwealth of Kentucky.

Thank you!
