

# Presentation Outline

## 2008 Road Dust Management Practices and Future Needs Conference

### Planning and Design for the Future – Industry Prospective

Steve Bytnar – Envirotech Services, Inc.

#### Obstacles and Barriers to Advancement – Industry Prospective

- I. Dust Control vs Stabilization
  - a. What does the customer want?
  - b. Understanding and agreeing upon expectations
- II. Specifications
  - a. Category Specific
  - b. Commodity vs Proprietary
  - c. Performance Based Specifications
  - d. Environmental Specifications
- III. Road Base Variation and Interaction with Differing Products
  - a. Sand
  - b. Clay
  - c. Aggregate
  - d. RAP
  - e. Recycled Concrete
  - f. The vital importance of proper road base preparation and application
- IV. Testing of Products and Road Bases in Lab

- a. Lack of consistent procedures
- b. Variations for products that perform “differently”

V. Bringing New Products to Market

- a. No defined channel or group for testing and field evaluation
