2022 CUTC SUMMER MEETING

JUNE 13-15, 2022  **BIG SKY ★ MONTANA**

The 2022 CUTC Summer Meeting - The Power of Partnership, is being hosted by SURTCOM (Small Urban, Rural and Tribal Center on Mobility) in BIG SKY, MONTANA - JUNE 13-15, 2022.

Join us where the wide open spaces and big skies of Montana meet the heavily traveled, curvy two-lane roads to Yellowstone National Park. The influx of people from all economic levels, travelling many miles of roads through tribal lands and rural communities, has a huge impact on regional transportation costs, mobility, and safety. Many other rural areas across the country share our transportation challenges: lack of alternative routes, limited public transportation, limited communication options, wildlife on the roadway, and difficult driving conditions. Learn how SURTCOM and other UTCs are forging partnerships with public/private agencies, NGOs, and their communities to overcome fiscal and institutional obstacles, and implement creative solutions to address some of the most critical issues of our time, like expanding transportation access and reducing road fatalities.

SURTCOM

The mission of the Small Urban, Rural and Tribal Center on Mobility is to conduct research and provide leadership, education, workforce development and technology transfer in all transportation-related aspects of mobility for people and goods, focusing specifically on small urban, rural and tribal areas. >> surtcom.org
